AG BLOCK

NON-SHRINK HYDRAULIC MORTAR

AG BLOCK is a type of ready-to-use, quick-hardening, non-shrink thixotropic hydraulic mortar. This mortar contains corrosion-resistant synthetic and metal fibres and is resistant to de-icing salt, oil and hydrocarbons.

AG BLOCK is applied in layers between 3 and 30 cm thick.

Possible applications:

- fixing and levelling manhole covers, gully covers, and drains on roads, pavements and in car parks;
- fixing poles, posts, signs, steps and fountains;
- installing trap doors for gas and electrical installations;
- quickly repairing potholes, rockpockets and concrete roadways.

**AG BLOCK IS AVAILABLE
IN 25 KG BAGS.**
