## REGENERATING OXIDISED BITUMEN

VR22 is an oxidised bitumen regenerator that allows you to create new bituminous conglomerate by reusing the existing road surface.

VR22 can be applied using a special milling machine, capable of dosing the correct amount of regenerant. In this way it is possible to mill and at the same time mix VR22 homogeneously with the road milling.

# VR22

After a quick arrangement with a rake it can be compacted with a roller or vibrating plate. Once the material is compacted, it is possible to reopen the road to the passage of traffic.

**Possible applications:**

- replacing and restoring damaged road surfaces, without the use of new hot-mix asphalt.

**VR22 IS AVAILABLE IN  
VARIOUS FORMATS:  
20 KG JERRY-CANS,  
200 KG DRUMS,  
900 KG TANKS  
AND 600 ML CANS.**

## TECHNICAL FEATURES

TECHNOLOGY  
ENVIRONMENTALLY  
SUSTAINABLE

100% ASPHALT RECYCLING

ZERO EMISSIONS  
OF PLANT

NO HANDLING OF WASTE  
IS NECESSARY

QUICKLY ENSURES  
ROAD SAFETY

ASPHALT REGENERATED  
ON THE SPOT

EASY TO APPLY AND  
EASY WORKABILITY
