VIBRATION ABSORBER FOR MANHOLE COVERS AND DRAINS

VIBLOCK is a quick-hardening two-component polymer resin designed to prevent any vibration and noise produced by vehicles driving over manhole covers and drains.

VIBLOCK

vibration remover

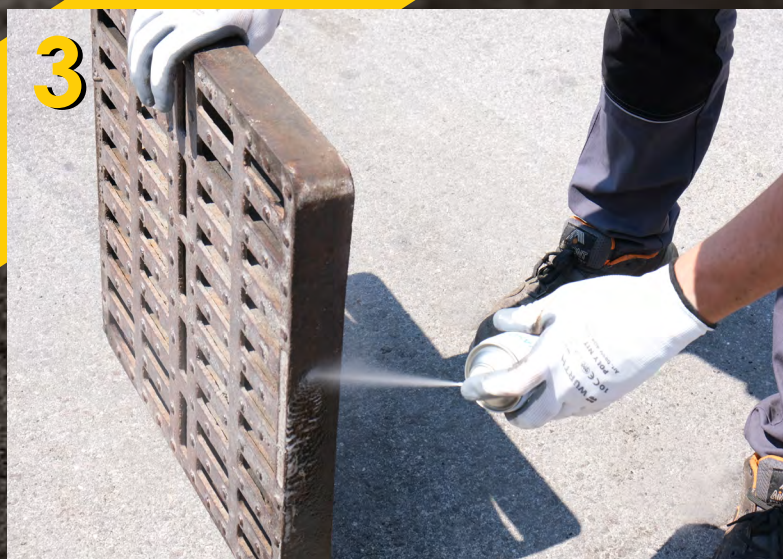

VIBLOCK

IS QUICK AND EASY TO USE

First, open the manhole cover, and then:

1. clean and dry the frame thoroughly to remove any dust and moisture, which would prevent the product from adhering to the surface; similarly, clean the inside of the cover;
2. insert the two-component cartridge into the cartridge gun and apply the product along the edge of the frame, using the special nozzle;
3. apply lubricating grease to the cover, to prevent it from sticking to the resin;
4. after 5 minutes of applying the product, simply put the cover back on. The road can be opened to traffic after 40 minutes.

**VIBLOCK IS AVAILABLE IN
1 KG CARTRIDGES.**
